Abstract (en)
[origin: WO202229455A1] The invention is based on a domestic appliance device (10a), in particular a hob device, having at least one control unit (12a) which in the course of the performance of at least one appliance function outputs at least one suggestion relating to at least one appliance function parameter assigned to the appliance function. In order to make available a generic device with improved properties in respect of the operating convenience, it is proposed that the control unit (12a) takes into account at least one history in the suggestion.
