Abstract (en)

[origin: WO2020229341A1] What is disclosed is a connecting pin for producing an electrical and mechanical connection to the through-contact, having a shaft section and a spring section, wherein the spring section has at least two spring elements, wherein, between the at least two spring elements, at least one material split is arranged running in the longitudinal direction of the connecting pin, and wherein the spring elements protrude beyond the shaft section radially outwards, at least in certain regions. Furthermore, a method for manufacturing a connecting pin and a connecting arrangement are disclosed.
