Abstract (en)

[origin: WO2020229074A1] A method for installing a computing component (COMP1) in an electronic device fitted in a vehicle, comprising the steps consisting of: - receiving a device packet (ECUPACKIND) comprising a manifest (ECUPACKIND) including a hash value (H(COMP1)) of the computing component; - checking the integrity of the manifest (ECUPACKIND); - receiving the computing component (COMP1); - checking the correlation between the hash value (H(COMP1)) of the computing component and the computing component (COMPi) received; - installing the computing component (COMP1) only in the case of a positive check of the integrity of the manifest (ECUPACKIND) and a positive check of the correlation. An associated electronic device is also described.
