Abstract (en)

[origin: WO2020229142A1] A control apparatus and a method for controlling wireless data transmission of a sensor apparatus. The method includes: detecting (602) a need for the wireless data transmission of the sensor apparatus; selecting (604) a configuration for the wireless data transmission of the sensor apparatus from among a plurality of configurations for the wireless data transmission of the sensor apparatus based on the need; and commanding (606) one or more wireless transceivers coupled with the sensor apparatus to operate the wireless data transmission according to the selected configuration.
