Abstract (en)

[origin: EP3971067A1] A straddled vehicle (1) includes: a seat lock bracket (30) attached to a seat frame (76) and disposed near a rear end portion of a main seat (20); and a main seat lock mechanism (40) to secure the main seat to the seat frame in a detachable manner. The straddled vehicle further includes a manipulation restricting member (60) to restrict manipulation of a manipulable portion (42b) of the main seat lock mechanism, the manipulation restricting member being provided as a separate piece from the tandem seat (22) and mounted to the seat lock bracket in a detachable manner. The manipulation restricting member includes a recess having a depth extending along an up-down direction (61).
