Abstract (en)

Material handling vehicle (1) comprising, a load carrier (2), a control unit (6), a hydraulic system (20) for operation of hydraulic functions of the material handling vehicle (1), including the lifting and lowering of the load carrier (2), wherein control unit (6) is connected to a passage valve (5), such that the control unit (6) is able to control the hydraulic fluid flow through the passage valve (5) by sending control commands to the passage valve (5), wherein the passage valve (5) is positioned directly in the hydraulic lift cylinder (3) and/or in the passage (9) of the hydraulic lift cylinder (3). There is also disclosed a method and a computer software executing the method.
