Abstract (en)

[origin: WO2020234001A1] The invention relates to an electromotive adjusting device (10) for adjusting the inclination of a protective part of an item of seating furniture (1), comprising at least one pivot drive (11) for securing to the body element of the item of seating furniture (1) having a rotatable drive element (116a) on which a drive bracket can be securely fixed and which supports the protective part. The invention further relates to an item of seating furniture (1) comprising an electromotive adjusting unit (10).
