Abstract (en)

[origin: WO2020233875A1] The invention relates to a massage device (1) for massaging, comprising a holding portion (2), having a proximal end (5) and a distal end (6), both lying in a curved or not curved holding plane (7). The massage device (1) can thus be held interdigitally between the proximal ends of two adjacent fingers of a user such that the proximal end (5) of the holding portion (2) rests against a portion connecting two fingers. The massage device (1) further comprises a massage portion (3) and a drive unit (31) for generating stimulation. The invention further relates to a use of such a system.
