Abstract (en)
[origin: WO2020232552A1] A hockey stick or other sporting implement designed to enhance its use, performance and/or manufacturing, including, for example, by being lightweight, having improved strength, flex, stiffness, impact resistance and/or other properties, reducing scrap or waste during its construction, and/or enhancing other aspects of the hockey stick or other sporting implement. For instance, in some embodiments, the hockey stick or other sporting implement may include a structure that is open, such as by being latticed (e.g., trussed), and/or made by additive manufacturing, selective material positioning, etc.
