Abstract (en)

[origin: WO2020234580A1] A device (10) for spraying a fluid onto a target (14) is provided. The device comprises: a container (16) configured to hold the fluid; a spray nozzle (18) in fluid communication with the container and configured to spray the fluid onto the target; a retainer (20) for attachment to an aircraft; and a conduit (24) for providing separation between the container and the spray nozzle, wherein the conduit comprises at least one adjustable joint configured to change the position of the spray nozzle relative to the retainer.
