Abstract (en)  
[origin: WO2020234181A1] Construction element (1) comprising: • - a first wall (8) defining a front face (2) and a second wall (9) defining a rear face (3), the first and second walls (8, 9) being spaced apart in a longitudinal direction; • - a third wall (10) and a fourth wall (11) respectively defining a first flank (5) and a second flank (4) that are spaced apart in a transverse direction, and each connecting the first and second walls (8, 9), and wherein first edge faces of each one of the first, second, third and fourth walls (8, 9, 10, 11) define a base face (6), and second edge faces of each one of the first, second, third and fourth walls (8, 9, 10, 11) define another face (15), opposite to the base face (6) in a height direction, characterized in that the second wall (9) defines a rear face (3) parallel to the front face (2) and comprises a portion (13) whose thickness increases linearly in the direction of the base face (6) joining the third and fourth walls (10, 11) and forming an inclined internal face (91) of the second wall (9), on the opposite side from the rear face (3).
