Abstract (en)
[origin: WO2020233947A1] The invention relates to an assembly for a turbomachine (2), comprising a turbine nozzle (10) which comprises a tubular platform (102), an inner radial flange (103) extending radially inward from the platform (102), and a plurality of vanes (101) extending radially outward from the platform (102); a housing (30) comprising an outer radial flange (303); a stopper (70) for axially holding the outer radial flange (303) in contact with the inner radial flange (103); and a support ring (40) attached to the housing (30) and radially supporting the stopper (70). The invention is characterised in that the stopper (70) is formed by a head (72) and a body (78) removably assembled on the head (72).
