Abstract (en)  
[origin: WO2021224116A1] The invention relates to a watch glass (10) which comprises a first piece of glass (1), a second piece of glass (2), and a decorative element (3), in particular a decorative stone. The first piece of glass (1) and the second piece of glass (2) are connected together via a connecting intermediate layer (5). The first piece of glass (1) has a through-hole (4), and the decorative element (3) has a base region (31) which is arranged in the through-hole (4) of the first glass (1) without the use of a mounting and is in direct contact with the connecting intermediate layer (5). The invention further relates to a watch (100) having such a watch glass (10).
