Abstract (en)

[origin: WO2020233991A1] The invention relates to a method for operating a deep neural network (5), wherein the deep neural network (5) is operated with multiple layers (22) between an input layer (20) and an output layer (21), and wherein, in addition, at least one classic filter (24, 25) is used in the deep neural network (5) between the input layer (20) and the output layer (21). The invention also relates to a device (1) for data processing, a computer program and to a computer-readable storage medium.
