Abstract (en)

[origin: EP3973827A1] Disclosed is a lid 100 for a food receptacle 200, the lid comprising a ring component 110 with a pouring 111, a swivelling pouring cap 130 hinged in the ring component 110 so as to form a lever, and an elastic element 140 urging the pouring cap 130 towards a first swivel position. The lid 100 further comprises a centre component 120 closing or at least configured to close an inner space at least partially surrounded by the ring component 110 while being rotatable about a designated rotation axis X. By rotation of the centre component, the pouring cap 130 is swivelled so as to selectively close or release the pouring 111. Further disclosed are a container 10 comprising a food receptacle 200 and a lid 100, and a kitchen appliance comprising a base and such container.
