Abstract (en)

[origin: WO2022063466A1] Flowable detergent preparation containing, relative to its total weight, a) 40 to 80 wt.-% surfactant, b) 5 to 25 wt.-% organic solvent; the flowable detergent preparation, relative to its total weight, containing a1) 10 to 30 wt.-% non-ionic surfactant from the group of the alkyl ethyl oxylates and a2) 1 to 15 wt.-% of a polyalkoxylated amine with a weight-average molecular weight Mw in the range of 600 g/mol to 10000 g/mol, which can be obtained by the reaction of ammonia or primary alkyl- or hydroxyalkyl amines that have a molecular weight of less than 200 g/mol with alkylene oxides. The invention also relates to a textile washing method using these detergent preparations.
