Abstract (en)

A broadcast receiver is configured to receive a digital broadcasting signal and an analog broadcasting signal of simulcasting having format different from format of the digital broadcasting signal. The broadcast receiver comprises an outputting means configured to output one of the digital broadcasting signal and the analog broadcasting signal to a predetermined outputting device, a judging means configured to judge whether a signal processing has been completed to the extent that the outputting means can output the digital broadcasting signal, and an output controlling means configured to cause the outputting means to output the analog broadcasting signal when the judging means does not judge that the signal processing has not been completed.
