Abstract (en)
[origin: WO2020239279A1] The invention relates to a vibration absorber for securely locking to the housing of a transmission. The vibration absorber as an absorption mass (101) having a first group of segments (103a, 103b, 103c, 103d) that are rotationally symmetrical to each other with respect to a rotational axis and/or a center axis of the transmission.
