Abstract (en)
[origin: WO2020239927A1] The invention relates to a goods carrier system comprising a goods carrier and comprising cell carriers for the formation of battery cells, said goods carrier having a guide device for receiving the cell carriers, wherein the cell carriers have contact elements for supplying an inserted battery cell with current, wherein the cell carriers can be clamped in the goods carrier, wherein connections for supplying cell carriers with current are brought together centrally on the goods carrier to form electrical connections.
