Abstract (en)

The present invention concerns an apparatus (10) for centering textile products (50) and a machine (100) for processing textile products (50) comprising one or more processing apparatuses (101), at least one transport element (102) and at least one centering apparatus (10) as above. The present invention also concerns a centering method able to be implemented by means of the apparatus (10) for centering textile products (50).
