Abstract (en)
[origin: EP3978700A1] A prefabricated mounting panel comprising a plurality of construction and technological layers is characterized in that the panel (1, 17) comprises a construction core (2, 2a) connected on at least one side by a technological layer (8) to a finishing layer (10). The finishing layer may be in the form of ceramic or porcelain tiles or any other known finishing form. The system of prefabricated mounting panels and / or walls is characterized in that it comprises a plurality of prefabricated mounting panels (1, 17), wherein the panel (1, 17) comprises a construction core (2, 2a) connected via a technological layer (8) to the finishing layer (10) and means for joining with other surfaces and for joining between these panels (1,17).
