Abstract (en)
[origin: EP3978861A1] A shooting device (10) configured to use laser beams to set a safe shooting angle, wherein the shooting device (10) comprises a holder or casing (12) and two laser pointers (14) mounted relative to the holder or casing (12) and each other. The holder or casing (12) includes one or more mount/locators, which are configured to locate and support the laser pointers (14) against movement and relative to each other at a predetermined angle such that the laser pointers (14) are operable to emit laser beams at the predetermined angle.
