Abstract (en)
[origin: WO2020246927A1] A compound for use in the treatment of saprolegniasis in an aquatic animal is provided, in which the compound is an inhibitor of a non-homologous essential protein in Saprolegnia. The non-homologous essential protein is essential for a Saprolegnia oomycete and is not homologous to any protein in the proteome of the aquatic animal. The compound is selected from the group consisting of acetohydroxamic acid, azelaic acid, sulfamethoxazole, chloramphenicol, and a combination thereof.
