Abstract (en)
[origin: WO2021037344A1] The present invention relates to the fields of trusted computing and cloud computing. The present invention provides a trusted device for a trusted computing system. The trusted device is configured to obtain a numerical value and program code from a user device; calculate a hash value based on the numerical value and based on the program code; sign the hash value; and provide the signed hash value to a verification device.
