Abstract (en)
Provided is a dispenser (100), used for a washing appliance (1000), and a dispenser (100) body (10) and cover body (20). The body (10) is formed having an accommodating cavity (111) and a water inlet channel (61) in communication with the accommodating cavity (111); the accommodating cavity (111) is formed having an opening (110) located at the top of the body (10); the opening (110) is used for placing detergent; the opening (110) is also used for overflowing the liquid injected from a water inlet channel (61) into the accommodating cavity (111) so as to discharge the liquid to the exterior of the dispenser (100); the cover body (20) is configured to selectively open or close the opening (110).
