Abstract (en)
A package (100) includes a package body (110) adapted to package a cutting tool (150). The package body (110) including one or more first cut-out sections (120) adapted to at least partially cover one or more cutting edges (152, 154) of the cutting tool (150). The package (100) is characterized in that the package body (110) includes one or more second cut-out sections (130) such that a removable fastener (162) engages therewith. The removable fastener (162) is adapted to engage with at least one handle (156) of the cutting tool (150). The removable fastener (162) allows removable coupling between the cutting tool (150) and the package (100) by engaging with a hole (160) of the at least one handle (156) of the cutting tool (150) and the one or more second cut-out sections (130) of the package (100).
