Abstract (en)
[origin: EP3982034A1] A lighting assembly (1) for a vehicle is disclosed which comprises a light source (10) accommodated in a housing (5) and configured to emit light; an outer lens (20) corresponding to the light source (10) and being transparent for the emitted light of the respective light source (10) in an outwards direction; a filter (30) being in direct contact with an inner surface of the outer lens (20) and configured to homogenize the emitted light; a black mask member (40) surrounding the filter (30) an internal element (50, 50A, 50B) in the housing (5). The internal element (50, 50A, 50B) and the black mask member (40) are formed to face each other in a manner that a gap (70) is formed between the internal element (50, 50A, 50B) and the black mask member (40), wherein the gap (70) comprises at least one bent portion (72).
