Abstract (en)

[origin: WO2020249764A1] The invention relates to a supporting device (2), comprising a hanger-shaped body (3), on which a garment can be arranged, and tensioning means which are configured to tension the garment in order to facilitate crease removal. The tensioning means comprises flexible strings (12, 13, 14, 15) and a control mechanism (11) which is configured to displace the flexible strings (12, 13, 14, 15) between a rest position and a tensioning position, in which the flexible strings are elastically deformed and exert a tension on the garment.
