Abstract (en)

[origin: WO2020249510A1] The invention relates to an adjustment device for activating or deactivating at least one driver assistance system and/or at least one drive mode for an autonomous drive for a vehicle. A rotary push-button (1) is provided, and a driver assistance system and/or a drive mode can be selected by rotating the rotary push-button (1) and can be activated or deactivated by pressing the rotary push-button (1).
