Abstract (en)

[origin: WO2020251513A2] The present invention relates to a washing machine (1) comprising a body (2); a tub (3) which is disposed in the body (2) and wherein the washing process is performed; a housing (4) which is arranged on the body (2) and which is in fluid communication with the tub (3); a circulation line (5) which enables the water received from the tub (3) to be delivered to the housing (4); a dispenser (6) which is disposed into the housing (4); at least one detergent compartment (7) which is arranged on the dispenser (6) and wherein cleaning agents are loaded; and a filtering member (8) having at least one filter (9, 10) through which the water coming through the circulation line (5) is passed and which filters the particles in the water.
