Abstract (en)
[origin: EP3985320A1] Control of room comfort. A method of controlling a comfort parameter in a building, the building comprising a system for controlling the comfort parameter, the system for controlling the comfort parameter comprising a user interface device (1), a sensor (4), and a control device (7, 10), wherein the primary purpose of the sensor (4) is different from recording a signal indicative of the at least one comfort parameter, the method comprising the steps of: providing a demand signal in respect of a change in the comfort parameter, wherein the demand signal is provided by a user and using the user interface device (1); the user interface device (1) transmitting the demand signal to the control device (7, 10); the control device (7, 10) obtaining a reading from the sensor (4), the reading being indicative of a parameter other than the at least one comfort parameter.
