Abstract (en)
[origin: WO2020263085A1] A feeder arrangement (100) for feeding livestock, e.g. poultry or birds in general, comprising a storage facility (110) for storing feed (109) for livestock and a distribution device (D) fluidly connected to the storage facility (110) to receive feed therefrom. The distribution device (D) 5 comprises a single feeder outlet (108) or comprises a plurality of spaced apart feeder outlets (108) for placement above a livestock feeding zone, and wherein the distribution device (D) is configured to spatially distribute feed through the plurality of feeder outlets (108) across the livestock feeding zone. The feed is for example live larvae. An aspect of the invention relates to the use of the feeder arrangement of the invention for providing larvae to poultry, such that the feather condition of the 10 poultry improves.
