Abstract (en)
[origin: GB2584870A] A lipstick dispenser formed of a tubular body (fig 1, 4) comprising a base 6 and a cap (fig 1, 2). The base contains at least one slot extending along and through the side wall 20 and is made of paperboard or cardboard. A product stick carrier (fig 5, 30) is received in the base part in a sliding manner and contains at least one lug 32 which projects through the slot also made of paperboard or cardboard. The carrier can be a friction fit within the base. The dispenser can also have a shield 50 which can be attached to the carrier. A second invention comprises a stick dispenser having a tubular body made up of a base and a cap where the cap has an annular spacer received and fixed in the base. A twist cartridge is manipulatable by the user to extend or retract the stick.
