Abstract (en)

[origin: GB2585006A] The article, for example a shower tray, comprises a shell 9 which partially defines an internal volume with the internal volume having a shape and a pre-formed core 10, wherein the pre-formed core has substantially the shape of the internal volume and the pre-formed core occupies 90% or more of the internal volume. The pre-formed core may reflect a shape of the waterproof or splash-proof article and the core may comprise a plurality of pre-formed core sections. The pre-formed core may be formed of a composite comprising a mix of two or more materials comprising one or more filler materials mixed with a binder. The filler may comprise a wood-based material or a recycled material. The shell may comprise of a plastic material Also disclosed is a pre-formed core for an article, an ablutionary or plumbing system, a method of manufacture of a waterproof or splash-proof article and a method of manufacture of a pre-formed core.
