Abstract (en)

[origin: WO2020254103A1] The present invention relates to a product for dyeing keratinous material, in particular human hair, containing: a1) at least one amino-functionalized silicone polymer, and a2) at least one pigment, the weight ratio of all pigments (a2) contained in the product to all amino-functionalized silicone polymers (a1) contained in the product, i.e. the weight ratio (a2)/(a1) having a value of at most 0.95. The invention also relates to a method for dye keratin material using the aforementioned product on the keratin material.
