Abstract (en)

[origin: WO2020254656A1] The invention relates to a method for producing a casting mould (201, 204), according to which at least three, in particular at least four, five, more than five, or more than ten sandwich elements (300, 301, 302, 400, 401) of the casting mould are first produced separately from one another and are then combined into one or more stacks (1100) to form the casting mould.
