Abstract (en)
[origin: WO2020260786A1] Ventilator (100) for passenger compartment of a motor vehicle, comprising a housing with at least one outlet opening (2) through which air flows, means for guiding air (3, 10a, 10b) which are able to direct the flow of air in at least one outlet direction, the ventilator (100) further comprising light emitting means (7) which are able to emit at least one beam of light aligned with the outlet direction and/or having a specific wavelength, the wavelength being a function of a parameter relating to the air passing through the ventilator (100).
