Abstract (en)

[origin: WO2020254746A1] The invention relates to a motor vehicle door (1), having an outer wall and a lining (3) forming a casing (5), said casing (5) comprising: at least one reinforcement (15, 17) fixed to the lining (3) and extending along an inner face of the outer wall; a control support for the exterior opening (19) of the door (1), having at least one edge (19A, 19B), which is superimposed and attached to the at least one reinforcement (15, 17); the at least one reinforcement (15, 17) having a non-rectilinear transverse profile, the edge (19A, 19B) of the control support for the exterior opening (19) being superimposed on the at least one reinforcement (15, 17) and matching said non-rectilinear transverse profile of said reinforcement (15, 17).
