Abstract (en)

[origin: WO2020256650A1] The present invention relates a washing machine (50) for performing wet, dry, physical or chemical treatments on materials, comprising a front loading (51) or side loading (52) perforated drum (104) which is mounted respectively by means of a drum shaft (103) at the rear or by means of the drum shafts (103) at both sides horizontally or having an angle with the horizontal axis to a drum shaft bearing (102) system so as to rotate around the bearing axis. Said machine (50) comprises a drum (104) having at least one water-free dry zone (100) which cannot be accessed or contacted by the water draining from the drum (104) on at least one outer surface (104-S) of the drum (104) during all wet treatment application processes carried out by the washing machine (50) with water.
