Abstract (en)
[origin: WO2020260212A1] The present description relates to a formulation comprising a p-type organic semiconductor polymer comprising a conjugated aryl compound, a conjugated heteroaryl compound or a mixture of two or more of these compounds; an n-type semiconductor material comprising fullerene, substituted fullerene or a mixture of two or more of these compounds; a non-aqueous solvent, wherein the concentration of the p-type organic semiconductor polymer is 12 mg/mL to 17 mg/mL per milliliter of solvent, and the concentration of the p-type organic semiconductor material is 24 mg/mL to 28 mg/mL per milliliter of solvent.
