Abstract (en)

The present invention provides a package (1) of drywall sections comprising a first drywall section (2) and a second drywall section (3). Each drywall section (2, 3) comprises opposing side arms (5a, 5b) and a joining portion (4) extending between the opposing side arms. The first and second drywall sections are arranged in a stacked configuration such that a space (6) is defined between the first and second drywall sections. The package of drywall sections further comprises a plurality of fasteners for installing the drywall sections. The plurality of fasteners are disposed within the space between the first and second drywall sections. The package also includes a retainer (7) configured to retain the plurality of fasteners within the space between the first and second drywall sections.
