Abstract (en)

Disclosed is an air intake structure of a clothes treatment device. The clothes treatment device includes: an inner drum (1) forming a sealed container when a washing procedure is executed, wherein an air duct shaft (10) which is internally hollow and forms a channel is connected with the inner drum (1), an air cavity (9) wrapping the air duct shaft (10) is formed outside the inner drum (1), the air cavity (9) communicates with the interior of the inner drum (1) through the hollow channel in the air duct shaft (10), and the air cavity (9) is connected with an air duct (7) blowing a drying airflow.
