Abstract (en)
An anchor for embedment in a concrete body for lifting the concrete body, wherein the anchor includes a head having an aperture for engagement with a lifting device, and a pair of legs adapted for embedment within the concrete body, wherein a formation is provided to increase strength of the anchor when shear loaded, wherein the formation provides an I-Beam section taken diagonally across a shoulder of the anchor, at an angle substantially mid-angle between a transverse axis of the anchor and a longitudinal axis of the anchor.
