Abstract (en)
An indoor unit for air conditioner according to the present embodiment includes: a cross flow fan that forms an air flow of suctioning indoor air from an air inlet port and blowing out the air from an air outlet port; a fan motor that drives the cross flow fan; a holding case that holds the fan motor therein; a fitting portion to which the holding case holding the fan motor therein is fitted; a vibration damping member that is accommodated inside the holding case along with the fan motor and absorbs vibration generated when the fan motor is driven; and a compressing section that compresses the vibration damping member inside the holding case with the holding case holding the fan motor therein being fitted to the fitting portion.
