Abstract (en)
[origin: WO2020260950A2] The invention provides systems and methods providing precision targeting of neural structures for the treatment of a condition while avoiding collateral damage to surrounding structures, such as blood vessels and/or other nerve tissue. The invention further provides systems and methods for treating at least one of rhinitis, congestion, and/or rhinorrhea via thrombus formation. The invention further provides systems and methods for detection, identification, and precision targeting of neural tissue for the treatment of a neurological condition while minimizing or avoiding collateral damage to surrounding or adjacent non-neural tissue, such as blood vessels and bone, as well as non-targeted neural tissue.
