Abstract (en)

[origin: WO2020260748A1] Disclosed is an apparatus for handling solid material (7), comprising one or more transport tubes (12) arranged to receive a unit dose (10) of the material (7) to be treated, one or more treatment containers (29, 30, 31), and a source (27a) of transferring force to be targeted at the unit dose (10) of the material (7) to be treated, wherein the transferring force (27a) is arranged to carry the unit dose (10) in the transport tube (12), wherein one or more transport tubes (12) are connected to at least one treatment container (29, 30, 31) to move the unit dose (10) of the material to be treated along the transport tube (12) to the treatment container (29, 30, 31). Also disclosed is a method for handling solid material using the apparatus.
