Abstract (en)

[origin: WO2020260071A1] The invention relates to a side handle for an electric hand-held power tool, the side handle having a gripping region, which is designed to be gripped by a user, and a clamping unit by means of which the side handle can be releasably fastened to a machine neck of the hand-held power tool, the clamping unit having an operating element by means of which the clamping unit can be tightened and slackened, and the operating element, when the clamping unit is in the tightened state, being substantially flush with the surface of the gripping region. The operating element is preferably designed as a clamping lever.
