Abstract (en)

[origin: WO2021001222A1] The invention relates to a device for air distribution in the interior of a vehicle, comprising an air supply unit for conveying air and a textile air distribution device (3) which is fluidically connected to the air supply unit. The textile air distribution device (3) further comprises a spacer textile (4) composed of two textile base surfaces (4a, 4b) which are held at a distance by a plurality of spacing threads (4c) connecting both base surfaces (4a, 4b).
