Abstract (en)
[origin: WO2020257833A1] The invention relates to a furniture drive (4) for moving a furniture part (3) which is movably mounted relative to a furniture carcass (2), comprising: a first fitting part (5) for securing to the furniture carcass (2); a second fitting part (6) for securing to the moveable furniture part (3); and at least one articulated lever (7) which is connected in an articulated manner to the first fitting part (5) via a first joint axis (A) and to the second fitting part (6) via at least one second joint axis (B); wherein the at least one articulated lever (7) has at least two sections (18a, 18b) which are spaced apart from one another in a direction parallel to the joint axes (A, B) by an offset (ΔX), wherein the first fitting part (5) has a first notional central plane (P1) and the second fitting part (6) has a second notional central plane (P2), wherein the central planes (P1, P2) are spaced apart from one another in the direction parallel to the joint axes (A, B).
