Abstract (en)

[origin: WO2020259887A1] The present invention relates to a housing for a drive of a window or a door, wherein: the housing provides an accommodation space for a drive unit of the drive, the housing comprising a first housing part, a second housing part and fastening means; the first housing part and the second housing part can be fastened to each other with the fastening means to form the housing; as the fastening means, at least one fastening receptacle is arranged on one of the two components, first housing part and second housing part, and at least one fastening projection is arranged on the other of the two components. The present invention further relates to a drive of a window or a door comprising a drive unit and a housing, wherein the drive unit is arranged in an accommodation space of the housing.
